

KRIS G. IMHOF

(210) 563-5088 | Kris_Imhof@outlook.com | Active TS/SCI Clearance | linkedin.com/in/krisimhof

PROFESSIONAL SUMMARY

Cybersecurity and technology risk professional with 6+ years of experience leading secure network infrastructure, compliance programs, and enterprise risk operations in high-stakes, regulated environments. Holds an active TS/SCI clearance with hands-on experience across cloud security, COMSEC, cryptographic key management, NIST RMF, Zero Trust architecture, and AI-enabled platform integration. Translates complex risk postures into actionable guidance for senior leadership.

TECHNICAL SKILLS & CERTIFICATIONS

Security Frameworks & Compliance: NIST RMF, Zero Trust Architecture, COMSEC, Cryptographic Key Management, Identity & Access Management

Cloud & Infrastructure: Microsoft Azure, Palo Alto NGFW, VMware ESXi, Microsoft Active Directory

Platforms: Palantir Maven & Vantage, React Native, Expo, TypeScript

AI & Emerging Technology: Generative AI Tools, Prompt Engineering, AI-Assisted Development (Anthropic Claude), API Integration

CompTIA Security+ | CompTIA

Issued Feb 2024 | Expires Feb 2027

CompTIA Network+ | CompTIA

Issued Oct 2024 | Expires Oct 2027

CISSP | ISC2

In Progress — Target: Oct 2026

PRODUCT DEVELOPMENT

SecureMap — Cybersecurity Compliance Reference Application

2025 – Present

Independently conceptualized, developed, and brought to market a mobile cybersecurity compliance reference application targeting security consultants, students, and Department of Defense (DoD) contractors, covering eight enterprise frameworks including NIST SP 800-53, NIST CSF, CMMC, DoD IL 5 & 6, ISO 27001/27002, FedRAMP, CIS Controls, and MITRE ATT&CK. Built using React Native, Expo, and TypeScript with AI-assisted development via Anthropic's Claude. Published on the Apple App Store. Trademark application pending.

PROFESSIONAL EXPERIENCE

Senior Program Manager, Technology Operations (Company Commander/Battalion S3)

Jan 2025 – Present

United States Army | Fort Gordon, GA

- Lead a 656-person technical training organization certifying IT and network communications specialists to DoD enterprise standards; oversee a management team of 20 senior instructors across a large residential and technical campus.
- Serve as final authority on organizational compliance and regulatory adherence; ensure continuous alignment with DoD cybersecurity policy and NIST RMF requirements across all enterprise systems.
- Leverage Palantir Vantage to monitor training pipeline metrics and deliver data-driven executive briefings to senior leadership.
- Served as lead operational planner for a 2,000-person organization across five departments; oversaw enterprise Active Directory migration across 2,000+ endpoints and supported transition to a Zero Trust SD-WAN architecture with Zero Trust Network Access (ZTNA) implementation across enterprise endpoints, aligned with DoD Zero Trust strategy.

Technology Compliance & Operations Manager (Executive Officer)

Jul 2022 – Jul 2024

United States Army | Fort Hood, TX | Fort Bragg, NC

- Served as second-in-command across two consecutive technology organizations, overseeing asset portfolios totaling \$114M and teams of up to 277 personnel.
- Overhauled a non-compliant communications security (COMSEC) program by modernizing cryptographic key management systems and symmetric encryption key lifecycle processes in accordance with NSA and DoD security standards, resulting in a 98% improvement in operational readiness.
- Maintained compliance posture aligned to NIST RMF, ensuring all information systems maintained current Authority to Operate (ATO) status in accordance with federal cybersecurity standards.
- Led internal supply chain compliance audit identifying and resolving \$100K in asset discrepancies, earning the organization's top compliance rating.

Network Security & Infrastructure Manager (Platoon Leader)

Nov 2020 – Jul 2022

United States Army | Fort Bragg, NC

- Commanded up to 15 network engineering teams, 60 personnel, responsible for deploying and securing enterprise-grade satellite and terrestrial network infrastructure providing mission-critical voice and data services to U.S. and allied nation forces across Eastern Europe.
- Provided network infrastructure enabling one of the first operational deployments of the DoD's AI-enabled analytics platform, Maven (supported by Palantir), in an active operational environment to support real-time data fusion for mission commanders.
- Led a rapid deployment to Eastern Poland in response to the Russia-Ukraine crisis, commanding 15 teams as primary liaison to the 82nd Airborne Division; established secure communications infrastructure within 24 hours and provided the network backbone supporting the deployment of Azure-based cloud services to forward-deployed forces.

EDUCATION

Master of Science, Cybersecurity Management | Tulane University

Expected May 2027

Coursework: SOX Compliance, AI in Cybersecurity, Cloud & Mobile Security, Data & Database Security, Cyber Law & Governance

Bachelor of Science, Exercise Physiology | Baylor University

May 2020
